

Center Independent School District

Superintendent,

Dr. Brian Morris

June 27, 2022

To the Parents / Students of Center ISD,

Center ISD is taking a pro-active stance in dealing with a serious issue regarding students. This summer, we will be installing Vape sensors on our high school, middle school and elementary school campuses. Vaping has become a significant problem with our student population that reached all the way to Center Elementary School this past year.

The long-term effects of vaping are not yet known, but the rate at which students are doing this are staggering. We want to let you know that we are taking this step in an effort to prevent students from doing this on our campuses. If a student is caught, there will be some type of punishment administered to the student. The punishments will be in the CISD Student Code of Conduct for the 2022-2023 school year.

Please encourage your student not to vape at all, but if they decide to, they need to make certain they do not do it at school, on school property or at a school function on or off school property. Please help us keep our students healthy. Again we want to make you aware of this change prior to school starting so that no one is caught off guard, and everyone is prepared.

Sincerely,

Dr. Brian Morris
